

5 PROTECTIVE SHEETS, PADS & COVERS

TOUCHDRY® BREATHABLE ABSORBENT PAD RANGE

A new era in breathable bed pads

Haines®
MEDICAL AUSTRALIA

TouchDRY Breathable Absorbent Pads are white, soft, flat sheets with an absorbent layer and waterproof yet breathable underside. Designed to support climate control and preserve skin integrity, they lock away moisture to protect patients skin, and prevent fluid from seeping through to equipment or furnishings.

THREE LAYERS OF PROTECTION

- 1** The **soft, non-woven, air-permeable top layer** is gentle on all skin types including that of fragile paediatric, geriatric and bariatric patients.
- 2** The **super absorbent inner** draws body fluids away from the skin and locks them away to keep skin dry.
- 3** The **breathable, waterproof backing** assists the containment of fluid for safe disposal.

MOISTURE MANAGEMENT

TouchDRY dries faster than traditional bed pads, preserving the microclimate and patient comfort.

HIGH LEVEL FLUID HANDLING CAPACITY

TouchDRY absorbs 3.2 litres per m² (AWTA 62) assisting the containment and safe disposal of bodily fluids.

BREATHABLE BACKING

20 times more breathable than Blueys and Pinkies.

REDUCE COSTS

By protecting air assisted patient transfer mats, theatre tables and equipment.

HAINES® MEDICAL AUSTRALIA. ALWAYS THINKING. ALWAYS THERE.

Protective Sheets,
Pads & Covers

HOW DOES TOUCHDRY BENEFIT PATIENTS?

- **Breathability** - TouchDRY is 20 times more breathable than Pinkies or Blueys and 13 times more breathable than Depend bed pads (AWTA product test - ASTM E96-2012).
- **Keeps patients dry** - TouchDRY helps manage moisture and preserve the skin microclimate, reducing the risk of moisture-related skin damage - crucial for the preservation of skin integrity (refer to independent report and testing for more information).
- **Soft on skin** - Designed to be flat, soft and used in direct contact with skin. Ideal for absorbing leakage during wound care and surgical procedures, nursing patients with leg ulcers, lymphedema, pressure injuries and other open wounds.
- **Odour reduction** - The highly absorbent polymers encapsulated in TouchDRY's core help to reduce unpleasant odours.
- **No added pressure** - An independent pressure study proved that there was no additional pressure load on a patient's skin when using TouchDRY. Tests were conducted at 25kg, 50kg and 100kg. Contact us for a full copy of the report.

HOW DOES IT BENEFIT FACILITIES & STAFF?

- **Economic impact** - by alleviating strikethrough, effectively reducing linen changes and protecting equipment
- **Better fluid handling capacity** - 3200ml/ m²/24h (AWTA 62) as compared to the average market leading standard poly backed protective sheets which are 708ml/m²/24h (*"Review & Report on Haines TouchDRY Absorbent Pads – Moisture Management Focus"*, Sandy Dean, MWoundcare, RN FAWMA MACN)
- **Reduce costs** - typically less than the cost of machine washing
- **Always available for staff** - no waiting for bedpads to come back from the laundry
- **Compatible** with all pressure redistribution surfaces - assisting underlying microclimate therapies
- **Maintains structural integrity** when saturated, facilitating quick and easy disposal

DRIES QUICKLY TO KEEP PATIENTS DRY & COMFORTABLE

TouchDRY dries faster and is drier overall when compared to traditional bed pads - both disposable and reusable. Its low 'wick back' percentage reflects the effectiveness of TouchDRY's moisture wicking technology, supporting the microclimate around the skin, as well as general patient comfort.

MORE BREATHABLE THAN TRADITIONAL DISPOSABLE BED PADS

Moisture permeability/breathability is measured as the Water Vapour Transmission Rate (MVTR). This is the measure of the passage of water vapour through a substance. TouchDRY is 425.5g/m²/24h/23°C (see graph below) compared to 32.6 and 19.8 with other traditional bed pads (Test method ASTM E96-2012). The higher the score the more breathable the product.

SAFE TO LEAVE UNDER A PATIENT

TouchDRY products have no adverse effect on the pressure on a patient's skin. An independent pressure study proved little difference in pressure load to a patient when lying on TouchDRY, when compared to no bed pad at all. Tests were conducted at 25kg, 50kg and 100kg and the blue patterns indicates where pressure occurs.

Contact Haines for a full copy of the report.

No absorbent pad with 25kg of pressure

TouchDRY with 25kg of pressure

TOUCHDRY SIZES AND APPLICATIONS

90cm x 60cm

- Size: 90cm L x 60cm W

TOUCHDRY PLUS

Ideal for maternity wards

TouchDRY Plus is the most absorbent pad in the TouchDRY range, capable of absorbing over 5 litres of fluid. Designed to absorb the thicker fluids prevalent in birthing suites, it is ideal for use in maternity wards - before, during, and after birth.

TouchDRY Plus

- Size: 90cm L x 90cm W
- Absorbent area: 80cm x 80cm
- Maximum absorbency: 5.2 litres
- Each pad weighs 228g
- 4 bags of 10 pads

Code: **SBTD9090-P**

Qty: **BOX 40**

TouchDRY Plus with Wings

- Size: 190cm L x 90cm W incl. wings
- Absorbent area: 85cm x 80cm
- Maximum absorbency: 5.5 litres
- Each pad weighs 305g
- 3 bags of 10 pads

Code: **SBTDW-P**

Qty: **BOX 30**

GREENY® COMPOSTABLE UNDERPADS

The compostable, breathable alternative to traditional, single use underpads

Traditional, plastic-backed Bluey and Pinky underpads play a vital role in healthcare, however they have long been scrutinised - not only for their 'sweatiness', but for their environmental impact.

Blueys and Pinkies are extremely high-turnover consumables. A recent procurement audit of numerous Australian hospitals (conducted by sustainable healthcare advocacy group, TRA2SH⁵) found that between 15,600 and 96,000 Blueys were used at each site per year, relative to the number of theatres. With 1350 hospitals in Australia alone, that equates to roughly **75 million Blueys (over 1,950 tonnes) every year, taking over 100 years to break down** when disposed in landfill.⁴ And that's just Blueys, not larger, thicker Pinkies.

Like plastic underpads, the Greeny is designed to:

- **Trap and contain liquids** - protecting bedding, clothing and other surfaces from soilage and contamination.
- **Provide an absorbent surface** on which to perform clinical procedures.

But beyond that, Greenies are:

- **Composts in 180 days.**
- Made from **cornstarch-based bioplastic backing and 5-ply paper fluff pulp top layer**, sourced from responsibly managed forests.^{1,2}
- **Compliant with AS 4736 compostability standards.**
- **60% more absorbent** and **14 times as breathable** as 5-ply Blueys.¹
- **63% better for sweat management** than Pinkies.¹ Due to a higher 'water vapour permeability', Greenies reduce the tendency for a patient's skin to sweat like it would on a plastic-backed underpad, thereby reducing the risk of skin breakdown and associated injuries.³

Together, this means that Greenies can remain in place for longer - reducing underpad turnover - while providing a safer, more comfortable patient experience, with less residual impact on our environment.^{1,2,3}

SMARTBARRIER® BED PADS & CHAIR PADS

Washable surface protection,
ideal for incontinence

Haines®
MEDICAL AUSTRALIA

BED PADS

SmartBarrier Bed Pads are an absorbent pad designed for incontinence in adults. Available with or without a tuck-in to secure on the bed, they can be easily washed and reused. Features include:

- **Waterproof backing**
- **100% brushed polyester facing** for a soft comfortable feel
- **2.5L absorption capacity**
- **65 Poly/35 Rayon absorbent layer**
- **Piped, rounded edges** (not over-locked) won't fray which increases product life
- **Washable approximately 150 times**
- **Hand, machine or industrial wash and dry**
- **90cm width x 85cm long** (165cm total width with tuck-ins)
- **Colour:** Light blue

FLOORDRY® ABSORBENT MAT

Haines®
MEDICAL AUSTRALIA

For increased safety and efficiency

FloorDRY is a single use, non-slip absorbent mat, offering efficient, cost-effective protection in areas where the floor gets wet.

One FloorDRY mat can quickly absorb and retain up to 2 litres of fluid while maintaining its structural integrity and the waterproof, non-slip backing will not slip when stood on or walked over, ensuring staff safety.

HIGH FLUID CAPACITY

Independent testing shows FloorDRY can absorb and retain 7 times its weight in fluid. Each FloorDRY mat can hold up to 2 litres without leakage or loss of structural integrity.

FASTER CLEANING TIMES

Because FloorDRY locks in spills, it protects valuable equipment while reducing cleaning times, resulting in faster room turnover.

REDUCED CLEANING COSTS

Greater efficiency with easy-to-use FloorDRY cuts cleaning costs and increases productivity.

SLIP PREVENTION

With FloorDRY, you can rest assured that staff are more protected from slips and falls where wet floor hazards commonly occur.

DESIGN & TESTING

Holds 2.6 litres of fluid per square metre. High absorption without leakage or loss of structural integrity represents superior efficiency compared to many competing products.

FloorDRY is independently tested by AWTA, one of Australia's leading NATA-accredited independent materials testing facilities, to ensure quality and consistency.

STURDY, TWO-LAYER CONSTRUCTION

Firm, air-laid paper top layer

Absorbs up to 2 litres of fluid (2.6 litres per m²)

Thick non-slip PE base

Contains fluid and ensures FloorDRY remains in place when it is being stood on or walked over

FloorDRY Absorbent Mat

- Size: 100cm x 75cm
- Maximum absorbency: 2 litres
- 10 packs of 5 pads

DRAPESAFE™ FLUID CONTAINMENT DRAPE

Haines®
MEDICAL AUSTRALIA

The two-in-one draping solution for spill-prone procedures

Drapesafe is a compact, waterproof draping mechanism with an in-built fluid containment pouch, ideal for both urological and small surgical applications.

Developed to help alleviate the infection control, workplace safety and environmental concerns of spill-prone procedures, Drapesafe provides the best of both worlds: site protection and fluid containment in one.

For fluid-intensive procedures such as cystoscopies and IDC¹ manipulations, oversized drapes and makeshift fluid containment methods are common yet concerning. Not only can traditional approaches result in unnecessary waste, they can lead to occupational safety hazards through the ineffective containment of leaking fluids. In one clinical study, 84% of hospital staff acknowledged frequent soiling of linen or clothing with bodily fluids during IDC manipulations – many incidents of which went unreported².

Designed by an Australian urologist, Drapesafe can help mitigate these concerns; reducing the risk of site contamination, spills and slip hazards by providing an ideally sized and cleverly constructed means of protection.

FEATURES

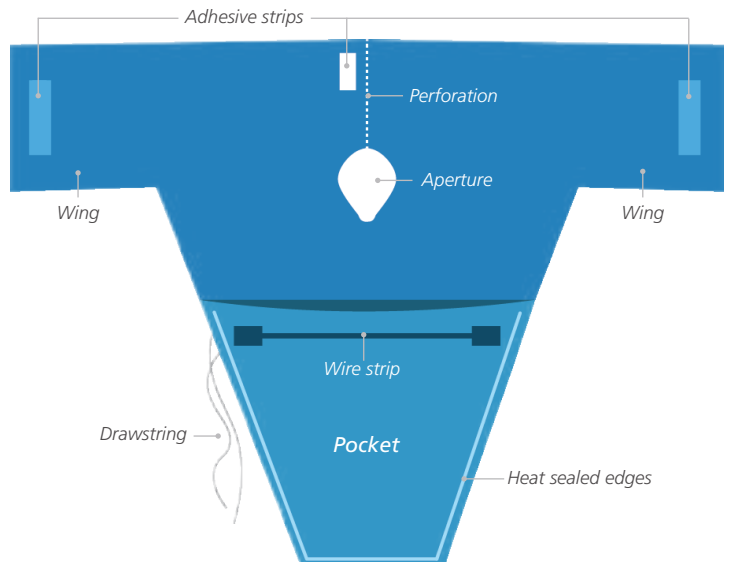

- **Heat-sealed, self-supporting pouch** - to catch up to 5 litres of fluid³
- **Handy disposal system** - complete with drawstring, for a self-contained, fuss-free cleanup
- **Expandable aperture (access hole)** - to suit both male and female patients
- **Ability to attach around a pre-existing catheter**
- **Sticky tabs on side wings to secure to the patient** (if needed)
- **Available in non-sterile and sterile variants** (see right)

A blend of ingenuity and common sense, Drapesafe is an ideal resource to have on hand for spill-prone procedures in urology and cystoscopy suites, wards and beyond.

1. Indwelling urinary catheter

2. Weerakoon et al, 2009. Draping and associated equipment for indwelling catheter manipulation by hospital staff: an assessment of attitudes and adequacy. BJU International, 103(9), pp.1206-1209.

DISPOSABLE WATERPROOF MATTRESS PROTECTOR

For temporary mattress protection

Haines[®]
MEDICAL AUSTRALIA

The **Disposable CPE Fitted Mattress Protector**, with sewn in elastic to ensure it is held in place, is designed for:

- Hospitals - to protect mattresses in high infection risk situations
- Aged care - for use with infectious patients
- Hospitality/beauty - to increase the life of mattresses

BENEFITS

- **Waterproof** - protect your mattress from fluid damage
- **Economical** - often less expensive than linen wash costs
- **Single Patient Use** for improved infection control
- **Stays in place** - elastic sewn all around so fits on mattress well
- **Can be recycled** when unsoiled - contact Haines for further information

SMARTBARRIER® PVC MATTRESS COVERS

Haines®
MEDICAL AUSTRALIA

For reusable mattress protection

Haines SmartBarrier PVC Mattress Covers provide an optimum blend of hospital-grade protection, easy maintenance and quiet comfort. Available soon in two styles: 1) **Fitted** for ongoing ease of use, and 2) **Fully Enclosed** for maximum protection, they are:

- **Waterproof, fire retardant, latex-free and bacteria resistant.**
- **Stitched at the seams for durability.**
- **Designed to adhere with Australian standard mattress sizing.**

- **Soft and quiet** – Less 'crunchy' than typical PVC covers.
- **Easy to clean** – Simply wipe with warm soapy water or mild disinfectant.

SmartBarrier

Fitted Mattress Covers

- Easy to fit and remove, in the style of a fitted sheet, providing a secure fit and reliable protection.
- Deep sides - Fits most mattresses.
- Made from high-quality Mackintosh PVC - **Lilac**.
- Available to fit a wide range of mattresses, including Long Single and King.

Cot

ANTIBACTERIAL TROLLEY COVERS

For infection control and regulatory compliance

Haines[®]
MEDICAL AUSTRALIA

Haines **Antibacterial Trolley Covers** provide an infection control and user-friendly alternative to reusable or ill-fitting single use plastic covers. Used to protect linen or other trolley-transported items on manual or robotic trolleys, they are designed to reduce the risk of fluid or dust contamination during transportation and storage, while providing quick and easy access for staff.

In facilities with in-patients, regulatory audits often assess trolley coverage due to the risk of bacterial contamination and transmission. Haines helps facilities meet these stringent standards through the provision of a unique antibacterial, made-to-measure solution.

ANTIBACTERIAL, ANTIFUNGAL & SPORICIDAL (C.diff spores)¹⁻⁹

Made with our Antimicrobial Medical Curtain fabric (Summer Blue only) which is treated with antimicrobial and antimildew chemicals - including nanometer silver - to inhibit bacterial growth.

MADE IN AUSTRALIA

Locally made with a **turnaround time of 3+ weeks** for custom orders depending on quantity and production backlog.

MADE-TO-MEASURE

Two standard sizes available for common trolley sizes, with a complimentary Measure & Quote service for custom sizes (minimum order quantity of 5 applies for custom sizes).

COST-EFFECTIVE

Intended as a temporary product with a lifespan of 3-12 months depending on heaviness of use, mitigating the costs and risks of single use covers and/or the washing of reusable covers.

ROBUST AND RECYCLABLE

Made from robust, fire retardant, 120gsm non-woven polypropylene with heavy duty zips - 100% recyclable when zips removed.

HANDY FEATURES

Available with zips for easy access, side pocket for documentation, cut-outs for trolley handles and 'date change' label to monitor length of use.

SIZES

Size: **Medium** 145cm W x 60cm D x 130cm H
Code: **DTCOVER-M**
