

ENTERAL FEEDING

www.midmed.com.au

1300 643 633

WHY WAS ENFit™ CREATED?

In 2006, following several incidences of tubing misconnections within the clinical setting, the International Organisation, GEDSA was formed. After years of research and development, a unique locking system was developed called ENFit™. The recommendations for the system was ISO:80369 and this has now evolved to the Standard ISO:80369-3.

GEDSA is a non-profit trade association, formed to establish a voice for addressing issues that faced enteral device manufacturers, suppliers and distributors, and to help international standards for healthcare tubing connectors comprised of manufacturers, clinical and medical staff and suppliers worldwide, GEDSA facilitates information flow about the initiative, which is designed to increase patient safety and optimal delivery of enteral feeding by reducing the risk of tubing misconnections. Our staff are GEDSA trained to provide you with information in accordance with ISO:80369-3

SUMMARY

Together with GEDSA, and our trusted suppliers, Midmed is pleased to offer our range of Enteral Feeding solutions to ensure the risk of tubing misconnections are minimised.

ENFit SINGLE AND HOME USE SYRINGES

STERILE ENFit™ HOME-USE SYRINGES - Up to 14 Day Use

- MS.SE01H - 1ml | 100 Per Box - Low Dose Syringe
- MS.SE03H - 3ml | 100 Per Box - Low Dose Syringe
- MS.SE05H - 5ml | 100 Per Box - Low Dose Syringe
- MS.SE10H - 10ml | 100 Per Box
- MS.SE20H - 20ml | 50 Per Box
- MS.SE60H - 60ml | 30 Per Box
- ISO 80369-3 standard tip for enteral use connection
- Silicone O-ring gasket design for clean and multiple use
- Available for Low Dose Tip design on 1ml, 3ml, 5ml
- Purple plunger for ENFit™ enteral identification
- Permanent and heat-etched dual graduations with more safety
- Safe plunger backstop to prevent withdrawal
- Sterilised by EO or Gamma, non-toxic, non-pyrogenic

Enteral Syringe Delivery Driver

Product Features

- Can be calibrated to meet your specific ENFit™ syringe technical requirements
- Bolus function
- Various visual and audible alarms
- Only compatible with Enteral syringe
- Rate or time delivery modes
- Battery running time - more than 6h at a rate of 5ml/h

Pre-calibrated to manage the following ENFit™ Syringes:

- MS.SE05
- MS.SE10
- MS.SE20
- MS.SE60

TUMMY BUTTONS

A button can be a comfortable solution, because of its small size and the fact that you don't have to carry a tube. We are committed to listen to the end-users and specialists and we show this by innovating our products year in, year out.

The MediLime Tummy Button has one sole purpose, and that is to make living with a feeding system more pleasant and efficient.

Product Features

- The MediLime Tummy Button consists of pure silicone, is latex- and DEHP free, resulting in a healthy skin around the gastro stoma.
- An apple shaped balloon improves an ideal shape for closing the stoma channel.
- Best compatibility with all MediLime Extension Tubes.
- Various balloon diameters (per size 12FR up to 24FR, from 3 up to 8ml volume) and is available in all lengths (cm) (0.8, 1.0, 1.2, 1.5, 1.7, 2.0, 2.3, 2.5, 2.7, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5 and 6.0).
- The Tummy Button comes with an input guide. This can be a useful tool when placing the button if there is scar tissue at the fistula opening or with a larger size of the Tummy Button.

Package Contents

The Tummy Button is packaged in a box along with the following accessories for easy placement:

- Input Guide
- Syringe
- Lubricating gel 5 grams
- Gauze

STOMA MEASURING DEVICE

The MediLime Stoma Measuring Device is used to obtain the correct size of the MediLime Tummy Button. The stoma canal is measured with this catheter. The use of the Stoma Measuring Device will result in a more precise Tummy Button placement. We strongly recommend using one for each (new) placement of a button in order to optimize the perfect fit.

Product Features

- Silicone Material
- PHT and BPA free
- Latex Free
- Disposable
- Sterile

MediLime Measuring Stoma Device with Syringe

GASTRIC FEEDING TUBES

The MediLime Gastric Measuring Device with ENFit™ connection is made for administering enteral nutrition and medication. The Gastric Feeding Tube is made of pure silicone and is therefore skin-friendly and pliable. The size of the tube and the balloon capacity are clearly stated on the shaft.

Product Features

- Stops stoma sites from closing
- Saves the stoma site until a new gastrostomy tube can be placed
- Includes a range of French gauge sizes in each pack which provides options even when stoma has started to close
- Effective, safe and inexpensive
- Saves staff in emergency situations
- Promptly dealing with gastrostomy emergencies prevents use of other incorrect or inappropriate feeding devices
- Made from high grade medical silicone for flexibility
- Tapered tip for ease of insertion

ENPLUGs are designed for emergency use to keep stomas from closing when a gastrostomy device has fallen out. The ENPLUG packs are available in 2 different lengths and various French sizes in case the stoma has already started to close and the currently used device no longer fits the stoma.

ENT.EN-PLUGS-S	10Fr / 12Fr / 14Fr / 16Fr x 4cm (Small)
ENT.EN-PLUGS-L	10Fr / 12Fr / 14Fr / 16Fr x 7cm (Large)
ENT.EN-PLUGS-XL	18 Fr / 20Fr x 7cm (Xtra Large)

ORAL SYRINGES

Oral Syringes

- Special tip design will not accept Luer connectors, preventing medication errors and accidental intravenous injections of oral liquids
- Permanent and heat-etched dual graduations with more safety
- Safe plunger backstop to prevent plunger withdrawal
- Not manufactured with PVC, BPA, Latex or DEHP
- Sterilised by EO or Gamma, non-toxic, non-pyrogenic
- Certificate: FDA, CE, MDSAP, MHRA, TGA, ISO13485, ISO9001
