Complex Triple Protein Blend

AdVital Hospital Strength Powder offers a triple protein blend of whey protein concentrate, calcium caseinate and full cream milk powder.

- ✓ **Muscle Maintenance & Mass** – Whey's high leucine content triggers muscle protein synthesis, crucial for preserving muscle mass in ageing.²
- ✓ **Sustained Amino Acid Release** – Caseinate provides a slow, steady supply of nutrients making it effective for prolonged muscle repair and growth.³
- ✓ **Supports Strength & Mobility** – Helps combat age-related muscle loss (sarcopenia) for better mobility and independence.⁴
- ✓ **Full cream milk powder** is nutrient-dense, providing essential proteins, fats, and carbohydrates to support weight and muscle maintenance.

Medium-Chain Triglycerides (MCTs)

AdVital Hospital Strength contains Medium-Chain Triglycerides (MCTs) offering fast, efficient energy.

- ✓ **Easier Digestion & Absorption** – MCTs are easier to digest than other fats because they go straight to the liver for quick energy, making them ideal for those with digestive issues, malabsorption, or recovering from illness.⁵
- ✓ **Muscle Preservation & Recovery** – By providing a readily available energy source, MCTs help spare muscle breakdown, ensuring the body maintains strength and function during recovery.⁶
